

AMENDMENTS TO THE SPECIFICATION:

Page 1, after the Title and before line 1, please insert the following heading:

Background of the Invention

Page 3, before line 1, please insert the following heading:

Summary of the Invention

Page 4, line 10, please insert the following heading:

Brief Description of the Drawings

Page 4, line 26, please insert the following heading:

Detailed Description of Embodiments

Page 5, please replace the paragraph beginning at line 16 with the following rewritten paragraph:

According to the invention, the contact portion is produced from a single composite plastics material which is constituted by the mixture of at least one anti-skid component (illustrated in a schematic manner by white circles 18a in FIGS. 2 and 2a) which has a viscosity V1 at the injection temperature and an anti-skid rigid component (illustrated in a schematic manner by black discs ~~20~~ 20a in FIGS. 2 and 2a) which is physico-chemically compatible with the anti-skid component and which has a viscosity V2 at the injection temperature. The

viscosity V1 is lower than the viscosity V2 so that the anti-skid outer zone comprises a higher concentration of anti-skid component than the rigid zone.
